

Pumpkin Pine

Species: Eastern White Pine

Thickness: 1 1/8"

Widths: Slightly variable widths from 3 1/2 to 5"

Lengths: Random lengths from 3' - 12'

Profile: T&G

Surface: Original finish

Character: Original surface, with occasional scratches, dents, nail holes

Applications: Flooring

Story:

The recipe for turning white pine into pumpkin pine calls for a coat of varnish, footfall, and plenty of time. We carefully extract original pumpkin pine flooring from 19th century houses, preserving the tongue and groove so it can be laid again. Starting out around 1 1/4" thick, this material is equipped to withstand centuries of use.
